

The Biography Of a Fly

If stable refuse and street sweepings that we have laid our eggs in is curled away, and piled up to decompose, we will hatch out there, and torment the farmer's cattle, so the cows will give less milk, and the horses will lose some of their vitality, having to fight us off all the time. We make it a lot harder for the horses' every summer.

If you want to get rid of us, the only way is to prevent us from having any breeding places, by keeping all the stable

refuse screened, or treating it thoroughly every little while with lime to kill our eggs.

Some day people will become enlightened enough so they will clean up everything thoroughly in the spring, brushing off every one of us that is clinging to the electric light cords, and seal cords in the market and stores, and from the walls. They will "swat us without mercy" until we disappear.

I suppose people would not like to have us leave fly specks on their candy, cake and bread, if they knew the specks were our excreta, and also that they

Mr. and Mrs. Neil Leitch and family returned to their home near Rex last Monday, after spending the winter months in Vancouver, B. C.

might contain disease germs, but they do not seem to know it. They say "Oh, it's only a fly speck!" They do not seem to care if the cake and bread be fly specked, they buy it just the same when they see it crawling all over it.

They think that wrapped bread looks a little smaller, but actual weight they are just the same. So why do people continue to buy the unwrapped loaf? If they watched as coming from the human excreta or stable filth, perhaps they would not be so willing to have us make a doormat of their foods, but they never notice, so we swear never to the food in the markets and stores, and have access to many a highly respectable kitchen.

I came near losing my life this morning bathing in somebody's milk pitcher, I was afraid I was going to drown, but a kind hearted lady lifted me out and poured the cream, with all those hundreds of bacteria I had left there, on the little girl's oatmeal. If he has Typhoid Fever I suppose her mother will wonder where she could have gotten it.

It was a sad day for us when it was established that we were carriers of Typhoid. How we are worried over the excreta in the open closet, vault, then started for the kitchen table to wipe our feet laden with filth and bacteria on the beefsteak, or to take a morning bath in the milk pitcher, leaving hundreds of bacteria there in the milk, in which they grow and multiply more rapidly than any where else.

We cannot live in a perfectly clean locality, where there is no filth or rubbish of any kind for us to breed in, so we shall disappear from the scrupulously clean places.

If you want us to give your baby Summer Complaint, your children Typhoid and hundreds of other Fevers, to infest the food of the household causing the whole family to become ill, why just leave the Closet, Stable refuse and Garbage accessible, we will do the rest. If not have these nuisances cleaned away, and we will starve to death, our eggs will never mature, and Disease will be a thing of the past.

School Report

Oyen School closed for the Easter vacation on Thursday, April 1. Classes will reassemble on Monday, April 12.

The Easter examination results had not been completely determined when school closed. A full report will be published in the Oyen News during the week beginning April 12.

W. L. Irvine, Principal.

The whist drive and dance, given under the auspices of the Ladies Altar Society of the Sacred Heart Church, last Monday, was well attended and the evening pleasantly spent. The net proceeds will amount to over \$50.

Don't miss the spring visit of Mr. R. W. Palmer, House of Commons representative, who will be at S. A. Miller's store on Saturday, April 24. Come and be assured for a suit of clothes or spring coat.

The lantern lecture on the Passion Play given by Rev. C. H. Cochrane on Good Friday evening at the Union Church was thoroughly enjoyed by a large audience.

John Love returned to Oyen last Saturday from Drumheller, where he spent the winter months.

The sale of home cooking, held under the auspices of All Saint's Guild last Saturday was well patronized and the ladies in charge were pleased at the gratifying results.

Miss Nellie Sharp spent the week-end at her home in town, returning to Sibbald on Monday.

Cheaper Fares For A.P.P.

Through the efforts of the railway department of the Provincial Government, an order has been issued at Ottawa granting to members of the Alberta Provincial Police the same transportation rates over railways as given to Dominion Police. This will mean the saving of several thousand dollars a year to the government, states A. Chard, Traffic Supervisor.

Spring Goods

Our Store is always the first to show new Spring Goods. We want you to look over our stock and inspect our New Goods.

We have an exceptionally fine line of Dress Goods, in the newest designs. Each pattern in one dress length only, moderately priced. Ask to see them.

Our Shoe stock has just been replenished. We have good values in Ladies and Men's Shoes. See our Special work Shoes for men, at \$1.50. Hard wearing Boys Shoes, at 3.75.

Good strong work Shirts from \$1.75 up

To our Town Patrons. We are again pleased to offer you Auto delivery. Twice daily at 10.15 a.m. and 5 p.m.

RAYMOND HATTON

MARY BRIAN

Returned men flock to see this comedy scream. If you did not get to France, you will see some of the things the boys did—and some of the things they didn't—but whether you were there or not, you'll get the best laugh you've had for many a day.

Adapted from the Saturday Evening Post story of the same name by Hugh Wiley.

Our advice to one and all is

DON'T MISS THIS PICTURE

Here and There

Sawn lumber production in Nova Scotia during 1925 totalled 390 million feet, according to the provincial government statistics. Of this quantity 175 million feet have been exported.

Canada's mineral output for 1925 is estimated at \$228,440,000, as compared with \$209,585,406 for 1924. The previous record was \$227,259,665 in 1920, when metal prices were about 35 per cent. higher than in 1925.

There are 4,645,700 acres of home-steed lands in Manitoba in a radius of 20 miles from railway lines. In all there are 252,880 quarter sections, or sufficient to settle 20,000 families, the bulk of the land being in Eastern Manitoba.

The value of wheat delivered at Western Canadian points from August 1 to December 15, 1925, was \$338,500,000, representing an average cash return to farmers of over \$1,200 per farm. This is a new high record and the returns are greater for the four and a half months than for the entire preceding year.

All roads lead to Oyen on Saturday. Be in town for Dial's Monster Community Sale. There's a tremendous quantity of things so "Father" will commence selling at noon.

REUSE "is good COFFEE"

A Matter of National Concern

Canada unquestionably derives many advantages from its close proximity to the United States with its large population, marvellous industries, and great wealth. Many of these advantages are so self-evident that it would be a waste of time to even enumerate them. But, on the other hand, it is equally true that Canada suffers as a result of the very close and intimate relations which exist between the Dominion and its big neighbor to the south. These advantages and disadvantages are very largely confined to the realm of economics.

The subject is so large that volumes could be written on it, pro and con. Among the many phases or angles of the complex questions involved in this very large problem, there is one which is now the matter of considerable discussion in Canada, because, while it is economic in its origin, it contains within itself possibilities affecting the whole social, industrial and political life of this country.

In a sparsely settled, largely undeveloped country like Canada, with people spread thinly over half a continent, and with some sections having little in common, except sentimentality, with other sections, there is actually lacking that community of interest, and resultant national spirit and consciousness, which animates smaller and more thickly populated countries. There is difficulty in the far eastern and far western Provinces knowing and understanding each other, while these far-distant sections are not even in the closest touch and sympathy with the central Provinces, which latter are more or less satisfied and self-contained and lack understanding of both the east and west.

Hallifax and St. John are closer to Boston and New York than they are to Montreal or Toronto; Montreal and Toronto are closer to New York, Philadelphia and Chicago than they are to Winnipeg; Winnipeg is closer to Chicago and Minneapolis than they are to Vancouver or to the cities of the Pacific; Portland and San Francisco than to Canadian centers. Such is the geographical position which nothing can overcome.

One of the most effective means whereby Canadians could be made to know and understand each other better, and become closer together, through the medium of national publications, weekly and monthly magazines and periodicals. Valiant efforts have been put forth by public-spirited men and women to provide such media, but with indifferent success, considering there are nine million people in Canada. The reason for failure is not far to seek.

With a population twelve times that of Canada, United States publishers develop enormously large circulations for their magazines. As a result they can command fabulous prices for advertising from the large and wealthy national manufacturers. With enormous revenue under their control, these publishers can command the services of the world's best writers, artists and illustrators. The result is they can turn out most attractive magazines, and of a class and at a price which Canadian publishers in their limited field cannot begin to approach. And, as Canadians desire the very best obtainable in magazines, as in everything else, these United States publications have large circulations in Canada than our own Canadian publications.

What will be the ultimate effect of this flooding of Canadian homes with United States publications? This is a question causing much concern not only to many Canadians but to thoughtful students of affairs throughout the Empire and in other countries. Canadians are being constantly supplied with the narrow United States viewpoint on all international questions which these magazines present as seen through Uncle Sam's spectacles and as they affect the big republic. Canada is a member and loyal supporter of the League of Nations, yet our people are supplied daily, weekly, monthly, with open and veiled criticism and denunciations of the League. The United States' viewpoint is urged as the only right one, and all others wrong. We are fed upon the open disregard for law which prevails throughout the United States; we have learned up to the practical breakdown of the marriage tie and decent domestic relations which characterizes the social life of the United States to date; we are inundated with stories of the coming bankruptcy of Great Britain and the breaking-up of the British Empire; and so on and ad nauseam.

What will be the effect on the social life and political institutions of Canada if this keeps up for another generation or two? Is there any remedy that can be applied? Canadian publishers believe that at least a partial remedy is possible, but that it must be applied in an economic way; that is, the remedy is not to be found in the arbitrary exclusion of United States magazines, but in providing a means whereby Canadian publications will be given a stronger chance to compete successfully with them through the production of Canadian periodicals more or less on a par from the standpoint of literary and artistic production with those from across the line.

As the subject is one which concerns all Canadians, it is proposed to examine further into the subject in a subsequent article.

Immigration Rush Begins

The week of March 12 saw the real opening of the spring rush of immigrants to Western Canada, when the Canadian National Railway transported during the week approximately 1,500 new citizens from the seaboard to Winnipeg by special and regular trains and thence, to their final destinations on prairie farms and in British Columbia.

Mrs. Jones—And how many evenings will you expect off each week? I never give away more than two.

New Madam—What kind of work do you do, ma'am. You see, I'm a debutante this season.

Children Cry for Fletcher's CAMPBELL'S

MOTHER—Fletcher's Castoria is a pleasant, harmless Sublimity for Castor Oil, Purgative, Teething Drops and Scouring Syrup, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Dominion Revenue Increasing

Figures Show Considerable Gain Over Preceding Year

Ordinary revenue of the Dominion increased by nearly twenty-nine millions during the eleven months ended February 23 last, as compared with the previous eleven months of the period. The monthly statement issued by the department of finance shows total ordinary revenue for the eleven months of \$337,895,443 as compared with \$308,394,207 for the previous corresponding period. Ordinary expenditures about the same as a year ago. On February 23 last it totalled \$226,629,117.

Joint Soreness Subdued, Swellings Quickly Reduced

Wonderful Results From Rubbing the Sore Parts With

NERVE LINE

"My testimony should convince any one that 'Nerve Line' is a splendid preparation to use on swollen joints, rheumatism and on bone and muscle pain of the complexity."

—Mrs. F. Henry, from Kingston.

"I went to McKay's Drug Store and they recommended Nerve Line, which restored me to health. I have Lambe's, Scarsville, you will get lasting satisfaction from a little bottle of Nerve Line. Sold everywhere."

Decrease in Railway Accidents

Number of Fatalities Through Accidents is Also Less

A considerable decrease in the number of railway accidents and in the number of fatalities is shown in the annual of the Dominion railway board for the calendar year, 1925. During these 12 months there were 2,713 accidents on Canadian railways, in which 272 persons were killed and 2,553 persons injured, as compared with 2,834 accidents in the previous year when 318 persons were killed and 2,524 persons injured. Classifying these casualties, there were six killed in 1925 as against 17 in 1924; 75 employees killed, as against 107; and 150 others killed, as against 184. Casualties protected by some means accounted for 76 killed in 1925 and unprotected crossings took a total of 294 killed and 1,161 injured.

During 1925 there were 889 fires originating within 300 feet of the railway lines, and these fires burned over 57,420 acres, destroying forest property valued at \$219,988 and other property valued at \$77,428. There were 26 public utilities destroyed last year.

Poland's New Sea Port

Gdynia Will Be Stripped Up-to-Date in Three Years

On good recent maps, written a correspondence of the London Spectator, the name Gdynia will be seen, a few miles northwest of the Free City of Danzig but still within the frontage on the Baltic coast of Poland, by the Treaty of Versailles. It is a tiny fishing harbor of about 200 souls, not Germany has always been a Polish subject. The Poles called it Gdynia and in July 1921 contracts for the construction of a new port there were made with a powerful French-Polish group. By 1920 Gdynia will be a port of the most up-to-date type with an annual handling capacity of two and a half million tons, equal to the present capacity of Danzig. It is backed by a level plain on which the towers of 1,000 people are being sprung up. The correspondent asked what about Danzig if Gdynia succeeds, and the Poles replied: "It will not be long before we shall be able to make (all) use of both Danzig and Gdynia."

A Household Medicine.—They are acquainted with the stirring proudest of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many of the most important ailments it is an indispensable household item. No, keep it in your house for it may come most unexpectedly.

Vodka in Russia

Demand For National Drink is Increasing According to Government Report

Russia is developing an insatiable thirst for vodka. Although the government within the last six months has more than doubled the output of vodka, it has been unable to meet the demand for the national drink.

According to figures announced, the government will produce 100,000,000 quarts of vodka during the coming year, which will yield the state about \$250,000,000 in revenue, or ten per cent. of the entire budget.

It's a good thing for humanity that some people are not as big as they think they are—the world would be overcrowded.

All Dr. Druggists

A Remarkable Operation

Vienna Surgeon Saves Woman's Life By Suturing Wound in Heart

It was announced that Dr. Nather, a young Viennese surgeon in the "Kaiserhof" clinic here, has saved the life of a woman of 25 by stitching two wounds in her heart after she had been stabbed by a drunken man.

Through the prompt action of the police Dr. Nather was able to operate on her 20 minutes after the crime. He went through three ribs, pierced the heart, located the injuries and made the necessary stitches.

Blood was immediately transfused and during the following days there were several injections of chloride of sodium (common salt) into her veins. She is now quite recovered from the heart, located the injuries and has been brought by Dr. Nather to the medical association.

NEW BLOOD NEEDED IN THE SPRING TIME

Try Dr. Williams' Pink Pills As A Blood Improving Remedy

Restoring Tonic
Every man, woman and child needs new blood. New blood is needed in the spring time. That is a scientific fact. All doctors know it. The blood grows old and poor in time, just as the soil does. It is not enough of it, and spring shows the result. Pale, nervous, and listless people are pale and listless at this time of the year. They cannot get their digestion worked so they cannot turn food into blood with the same facility. That is the Mother Nature urging them to improve their blood supply, but often their digestion is weakened so they cannot turn food into blood with the same facility. That is the Mother Nature urging them to improve their blood supply, but often their digestion is weakened so they cannot turn food into blood with the same facility. That is the Mother Nature urging them to improve their blood supply, but often their digestion is weakened so they cannot turn food into blood with the same facility.

The value of Dr. Williams' Pink Pills is all who are unsatisfied with the condition of their blood. It is proved by the experience of Mrs. Alex. McKee, Schenectady, Ont., who says:—"I was in a completely run-down condition, listless, sleepless, and loss of vitality were all mine. I felt miserable all the time and began to feel that my life was hopeless, as I had taken all the medicine I could find, but to no avail. I had then read of Dr. Williams' Pink Pills and I decided to try them. I got a half dozen boxes and by the time I had taken about half of them, I felt much better. I had then read of Dr. Williams' Pink Pills and I decided to try them. I got a half dozen boxes and by the time I had taken about half of them, I felt much better. I had then read of Dr. Williams' Pink Pills and I decided to try them. I got a half dozen boxes and by the time I had taken about half of them, I felt much better."

Whether you are seriously ill or merely feel easily tired and out-of-sorts, you need Dr. Williams' Pink Pills this spring. They are sold by medicine dealers everywhere, or will be sent by mail at 50 cents a box, by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Canadian Coal For Canada

Canadians are victims and dreamers of a good time coming when the \$50,000,000 that go out of Canada for the purchase of coal in the state of Pennsylvania shall be kept in Canada. Canada's anthracite coal field could be divided—\$50,000,000 for Nova Scotia and \$10,000,000 for Alberta coal—Kingston, Ont. W.A.G.

Make Breathing Easy. The congestion of the air passages and the struggle for breath, too familiar evidence of the cold, is now being met by Dr. J. D. Kellie's Ananas Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under the most trying conditions. It is an experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

The British Empire

The British empire includes over one-fourth of the land area of the earth, and about one-fourth of the world's population. That is to say, it contains about 463,000,000 people. Of these 57,789,000 are of British stock.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Wholesale Cleaning Refreshing

Worried Over Baggage Decrease

Light Luggage Causes Slump In Revenue For European Railroads

European express and train companies are clamoring for an increase in rates to make up the deficit caused by the lightness of the luggage of female travelers. Men used to be called the "salt case," but women have gone them one better. They are now the "habsers."

Baggage trunks, which used to be a gold mine for express companies and European railway lines, are no more. Mildly's wardrobe has become so slight that she can put her entire winter and summer outfit into a basket, which she carries in her compartment with her.

Most European lines have a sixty-pound limit on baggage, which may be checked free. Consequently transportation lines are almost as hard hit as cloth manufacturers and dye makers by the brevity of skirts and lack of hangers.

Forbidden Newspapers

Frenchmen and Italians Boicottage Banned Publications Across Border Into Italy

Rum rumors are afloat in America have their counterpart in bands of Frenchmen and Italians who carry into Italy copies of anti-Fascist newspapers and leaflets and forbid their sale in Italy. The Corriere Delle Italiane, published in Paris, is notable among the "booming" journals.

Many thousands of these newspapers are being taken into Italy and circulated, despite the general edicts forbidding them. In some cases these carried across the border into Italy in sealed wrappers, frequently bearing misleading outside addresses.

Stomach Troubles

Numerous Causes Responsible For Serious and Often Fatal Disturbances

Though it is true the majority of people know that errors in their diet result in personally unpleasant consequences, comparatively few are aware of the fact that numerous other causes are responsible for serious and often fatal disturbance of the organs of the digestive system. Indigestion, for body frequently creates more serious internal damage than will an over-acid stomach. But, be the cause of origin what it may, ninety per cent. of the cases of indigestion are due to the direct result of mismanagement of the functions of digestion. Confirmed indigestion, if neglected, demonstrated that experience generally produces only a temporary relief and, for this reason, is unsatisfactory to the public. Certain roots and herbs indigenous to tropical climates, however, have proved equal to satisfy the longed-for need of not only relieving pain, but also to fully restore the balance of the digestive system. It is to be hoped that a sufficiency of such medication can be secured to adequately relieve Canadian sufferers. Information concerning these (regional) medicines can be obtained by applying to Mr. F. Edwards, 1451 Yonge St., Toronto, Canada.

Through Service For Steamship Passengers

Canadian Tourist Inaugurates Through Tourist Sleeping Car

For the convenience of western passengers enroute to the Old Country, the Canadian Pacific Railway have inaugurated a through tourist sleeping car service from Winnipeg to Saint John, N.S.

The imperial will have Winnipeg on Tuesday night at 10:00 a.m. every Tuesday until April 20th, providing through service to the ships side at Saint John.

This service will prove extremely popular with passengers from the prairie provinces, eliminating as it does, changing trains at Montreal.

B.C. Applies

Export shipments of apples by the British Columbia Association Growers for the past season, included the following: 65 cars to Scandinavia, 5 cars to China, 10 cars to Japan, 4 cars to Newfoundland, 18 cars to South Africa, 42 cars to New Zealand, 45 cars to the United States and 55 cars to Great Britain. In addition, 108 cars were shipped to Ontario and Quebec, which are often considered as export markets.

By a high vacuum process, invented by a Swedish chemist, engineers can now "season" in a day or less, sufficiently for the carpenter's bench.

It justice were really blind at night would not be able to wink at her favorites.

EXPECT H.B. RAILWAY GRANT TO PASS HOUSE

Ottawa—Parliament concluded the first lap of its session and went off for a brief Easter recess. The government's position has strengthened and is solidified. At the outset when the first vital vote took place its majority was only three. In the meantime it has gone up as high as 16 on party divisions while, normally, it can rely upon a majority of about 12.

There has been complete cooperation between the Progressives and Liberals in the legislative programme which has been brought down again in every indication that all of it will pass the house without much difficulty. How portions will fare in the senate is not so certain. However, the Hudson Bay Railway, which is the cause of the vote for it in the estimates and there is no precedent for senatorial interference with such appropriations. The rural credits bill has yet to be introduced but both it and the budget are expected right after Easter. The creation of a party board and the personnel will be somewhat different than at first indicated—presumably, but nevertheless there will be some. The strong stand taken by the Liberal members from the west and Quebec, as well, in favor of a reduction of duties on motor vehicles, seems very likely to be given effect by the government, and it is expected that reductions in taxation will be announced.

Last Week In The Alberta Legislature

Move For Establishment of Eight-Hour Day in Industries Is Defeated—During the week the government have made good progress in the disposal of business, and the programme outlined at the beginning of the session is pretty much on schedule, with the prospect of the session concluding well within the eight weeks estimated by Premier Broyles at the opening of the assembly.

The sudden conclusion of the budget debate paved the way for discussion of the estimates. Six-tenths of the estimated total being now passed without difficulty. In most cases the estimates show light reductions, and there has been an apparent effort towards economy.

In the committee stage of the Factories Act the government approved the provision for the possible establishment of an eight-hour day in the industries of the province after Jan. 1, 1927. Strenuous objection had been taken to this. The section replacing the one objected to provides for the appointment of a committee to inquire into the practicality of an eight-hour day, the commission to report to next session of the legislature. The bill as amended was passed by the committee stage. It provides for a nine-hour day in industry, except where special exemptions are made to seasonal industries.

Resolutions proposed by Liberals that the supplementary revenue tax and land tax should be abolished were defeated on party divisions, the government stating that it was impossible to forego the revenue derived from these taxes.

A resolution proposed by the late Liberal member, Mrs. Nellie McClung, calling for a plebiscite at the forthcoming general election on the question of whether beer halls should be allowed to continue, was overwhelmingly defeated. The vote being 42, Liberals and Government united in opposition to the proposal, the only dissent coming from Mrs. McClung, Mr. Pearson, Independent, and Fred Wyle, Labor. The resolution is the outcome of a request made by the Alberta Prohibition Association.

The legislature has now approved of the bill for the transfer to Alberta of its natural resources and is now awaiting the action of the Dominion Government, which has introduced a similar bill in the Ottawa house.

Texas Bank Robbed
San Antonio, Texas—Staging the first bank robbery San Antonio has known in more than a decade, three armed men with shotguns entered the San Antonio National Bank, forced clerks, employees and patrons to kneel, took \$50,000 in currency and escaped.

Convicted Is Acquitted
Calgary—Constable Albert McKean, of the Drumheller town police force, was acquitted of a charge of manslaughter by a jury at the Assizes today in the criminal session of the Supreme Court. The jury deliberated but three minutes.

Saskatchewan Egg Pool

Commences Operations Under Most Favorable Auspices

Regina—With six candling stations, opened at Brandon, Weyburn, Regina, Moose Jaw, Saskatoon and Humboldt, the 175 receiving stations in various parts of the province, the Saskatchewan Egg and Poultry Pool has commenced operations.

Delivery of eggs at local receiving points has been heavy. Said Ralph Brighly, general manager. Over 2,000 egg crates of the heavy export, lettuce variety, with best grade gilters and maps and excellent padding top and bottom, have been sent out to four receiving stations. About 4,000 of these will be used for transporting the eggs between local receiving depots and the candling stations.

Explaining the pool method of operation, Mr. Brighly said the producers will send their eggs in lots of three dozen or multiple of three dozen to the local receiving stations. The eggs will then be shipped in bulk to the candling stations and sold direct to buyers or through the pool to be graded and graded. Remittance will be made from head office to producers about 15 days after the eggs are shipped.

It is expected that about 400 receiving stations will be established shortly. At present the egg pool has over 12,000 contracts signed. Many sign up campaign is still proceeding.

Radio In Lighthouses Would Aid Police

Member For Vancouver South Makes Suggestion in House of Commons

Vancouver—The suggestion of installing radio receiving and broadcasting sets in Canadian lighthouses to assist in the arrest of criminals is suggested by J. T. Laidler, Conservative, Vancouver South, in a series of questions placed on the order paper of the house. The intention of the department to install radio sets in lighthouses, and further extend to other Canadian lighthouses to radio receiving sets? Mr. Laidler asks.

"The government agrees that in the case of the big bank robbery at Nanaimo that the bandits were hiding in their launch close to the Fortler Pass lighthouse. The lighthouse keeper saw the said bandits' launch and also the police boat. He called the police and the launch robbery failed to get away. The estimated total being now passed without difficulty. In most cases the estimates show light reductions, and there has been an apparent effort towards economy.

"It is the intention of the department of Marine and Fisheries to install in certain of the more exposed light houses radio broadcasting equipment of sufficient range to communicate in case of emergency with large centres of population?"

Trapper Killed By Grizzly

Found By Partner Within Mile Of Their Camp

Prince George, B.C.—Tom Meany, a trapper on the north fork of the Mcleod River, 15 miles northwest of here, was killed by a grizzly bear within a mile of his camp, according to information brought here by Jack Meany, his partner. The dead man's partner, Yarezen, told the provincial police that Meany left camp to go over some traps and cut up the carcass of a moose previously killed. When he did not return Yarezen started to look for him. Within a half hour the body of Meany was found a short distance from the moose carcass, the face and top of the head being torn off. All around were tracks of a grizzly bear. Meany had been dead some time, but his hand still had a firm grip upon his axe.

It is surmised he surprised the bear while feeding on the moose carcass and was attacked by the animal.

Keep Liquor From Youths

Tokio—A nation-wide movement to prohibit the drinking of alcohol by boys under twenty-five years of age has been launched by eleven different bodies in Japan, including the Japan Temperance Union and the Women's Reform Society.

B.C. Industrial Accidents
Vancouver, B.C.—During 1923 a total of 27,563 accidents occurred in British Columbia's industrial establishments with 213 deaths, statistics made public by the Workmen's Compensation Board. Industrial accidents in 1923 cost the province more than \$1,000,000 in 1922 to \$1,000,000 in 1925.

Arab Women Fight
Jerusalem—Arab women are reported to have taken part in the riots of Insurgent Syria, fighting against the French Regime.

Canadian Engineers Praised By Allenby

Pays Tribute To Work On Bridge Construction in Palestine

Montreal, Que.—Glowing tribute to the high quality of the Canadian Bridge Building Battalion, the 48th unit from the Dominion under his command in Palestine, was paid by Field Marshal Lord Allenby, in an address here.

"The Canadian, 'all of them gallant fellows,' built the bridges in the face of great difficulties, many per cent of them were down with malaria, and the lack of fuel and the lack of the bridges which had been destroyed by the Turks in their retreat in September, 1918."

"That," said the Commander of Jerusalem and Damascus, "is what the Canadians did in Palestine."

Convict Ship Sails

The Last Convict Ship Afloat In The Twentieth Century

La Rochelle, France—"La Mariniere," the last convict ship afloat in the world, sailed recently for French Guiana carrying 340 convicts and long term sentence men. It was the last ship to sail from the South American station in more than two years.

"The Mariniere" was painted a weird combination of red, yellow, black and white and seemed to have emerged from the middle ages, until one convicts, under the command of the warden, waving his revolver, collapsed and died, bringing back the grim present.

WILL INTRODUCE PLAN TO SETTLE U. S. WAR CLAIMS

Washington—The treasury's plan to pay immediately the \$120,000,000 in claims of United States citizens against Germany on its own account, trusting to a refunding by the collection of German reparations, was put to Congress for approval in a bill introduced by Representative Mills, Republican, New York.

The programme proposed for a full settlement of all war claims between Germany and the United States, including the return of property of German nationals held by the Allen Property Custodian and the payment of German owners of ships, radio stations and patents taken and used by the United States Government.

It authorizes the government to borrow the money necessary to make such payments and provides that all receipts received from Germany on account of reparations and the cost of maintaining the United States on the Rhine shall be applied to a liquidation of this debt. The \$30,000,000 assuming interest from the money on deposit with the Allen Property Custodian prior to 1921 will also be applied.

WOULD LOWER CUSTOMS TARIFF ON AUTOMOBILES

Ottawa—G. G. Coote, Progressive, Macleod, Alberta, moved in the House of Commons last night that there should be a substantial reduction in the customs tariff on automobiles and motor trucks.

Mr. Coote substantiated that owing to the lack of transportation in Canada, especially in the west, Canadian farmers should be able to buy more motor trucks and automobiles. Canada, he said, really ought to have more motor vehicles per head of population than the United States, whereas the ratio was lower in Canada. There could be only one reason why it was lower, he said. That was the high price of autos.

In the west, the average distance which a farmer has to haul his produce is ten miles. Those who had much farther than this to take their products before they could be shipped to market, were surely entitled to greater consideration. Mr. Coote estimated that incidents of the customs tariff alone added \$205 to the price of a car in Canada. Besides this, there was the sales tax. Canadians also paid, on imported cars, United States excise duty of 5 per cent. All of this, Mr. Coote said, imposed an entirely unfair burden on the people who purchased cars. So far as the farmer was concerned, he said, a car was becoming a necessity and should not be taxed as it was a luxury.

Almost everywhere one went there seemed to be a demand for reduction in the tariff on automobiles, Mr. Coote said. Mr. Coote compared the prices of two makes of motor cars to show that increase in the Canadian price was from 25 to 12 per cent, over the American price.

The American manufacturer was taking advantage of the tariff. If you bought a car made in Canada the tariff went to the American manufacturer, Mr. Coote said. "This tariff is imposed on the Canadian people for the American stockholder," he said.

Paster In Good Condition
Berlin—Hospital authorities stated that the condition of Herr Jolly, postmaster, who established a record of 44 days abstinence from food, was "fairly good," under the circumstances.

He was not confused because of nervous consequences from the fast. It was said, but rather for scientific examination.

Jolly's real name is Siegfried Hiers.

Opens Navigating Season

Quebec—Making a passage for themselves through the ice-covered waters of the Lower Basin in the local harbor, two steamers, the Gaspe and the Gaspere, recently put out from the St. Lawrence to the accompaniment of numerous sterns which signified that the 1925 navigation season had begun.

Unemployed Defied Police

London—A meeting point for a crowd of several thousand unemployed demonstrators near Hyde Park, scattering them in all directions. The police acted when the demonstrators were attempting to form up in procession in defiance of police orders.

Miss Chiu Chin Chow and the Chow Puppy

Little Miss Chiu Chin Chow and the Chow puppy are all worn out from watching the wonderful white people on the Canadian Pacific River Empress of Scotland, which in her tour of the world stopped for a short time at Hong Kong, where this little Chinese dapper made her acquaintance. She is loud in telling us that she is a little more of the great world to which she has been a visitor only a few years. Doggy Chow is not quite so yearning to see the world as his mistress. The little dog is good enough for him so long as Miss Chow is within reach.

Communists Reverse Attitude Toward Church

Anti-Religious Plays By Young Members Are Forbidden

Moscow—Anti-religious plays and other performances by members of the Young Communist organization are forbidden under orders just issued by the central committee of that body.

The committee says that such plays are directed against the church and the church people, especially national minorities, and engender hatred of the members of the Young Communist party by the press, radio and the cinema.

The reversal of the attitude of the Communists toward the church is considered significant.

Soldiers' Settlement Act

Lengthy Debate Features Discussion Of Bill To Amend The Act

Ottawa—A lengthy debate occurred in the House of Commons on a resolution preceding a bill to amend the Soldiers' Settlement Act by providing for the settlement of soldier settlement lands. The debate was featured by an exchange of personalities between the Hon. Arthur Meighen, Opposition leader, and Hon. Charles Dunning, minister of railways. The resolution passed and the bill received first reading.

The fiery exchange lasted for about twenty minutes and the episode was warm and exciting.

Movement To Ban Undesirable Pictures

Advisory Commission Of League Wants Children Protected

Geneva—A movement to protect children throughout the world from undesirable moving pictures was initiated by the League of Nations advisory commission on child welfare, which has suggested a resolution for the creation of central censorship boards in each country, composed of educationists and parents.

The resolution stipulates that these boards should prohibit the presentation of films glorifying the brutality and morality of children.

Livestock Show At Calgary

The Largest Individual Winner Was A Local Exhibitor

Calgary—W. P. Fleming, Calgary, was the largest individual winner at the Calgary spring livestock show, when his entries were awarded first and second prizes for the best 15-month steers, first for the five finished steers and first for the best 15-month steers bred by a registered Angus bull. Angus bull. George Tate, Warren, Man., was first with the best five finished steers, and won 1,000 points. Special prize for the best cow and calf pair purchased at the Calgary stock feeder show was awarded to Paul Gabriel, Brinkley, Alta.

CLAIMS OCEAN RATES ON CATTLE ARE EXCESSIVE

Ottawa—Colonel H. A. Mullins, Conservative, Marquette, moved in the house that the Canadian Government Merchant Marine should withdraw all claims for the North Atlantic conference and should be operated independently of any conference, association or committee of oceanic lines, with the sole object of conferring the greatest possible advantage upon the Canadian producer.

He has been brought out during the parliamentary investigation of ocean freight rates that the Canadian Government Merchant Marine "is in" the hands of the North Atlantic conference just as all the other steamship lines, said Colonel Mullins. He did not know what the Government would do with this combine, and he wished the government would inform the house of the details of the combine. At an excessive rate of \$20 per head for carrying cattle across to England still prevailed, and western cattle shippers were beginning to wonder if they would ever see it reduced. Why, he asked, would it not be possible to shift vessels of the merchant marine for carrying Canadian cattle? There were 24 ships of 8,000 tons each, which could be used for the carrying of the cattle trade if properly re-equipped.

Hon. C. A. Dunning, minister of railways and canals, said that Colonel Mullins had not discussed the regulation itself. As a matter of fact, however, the resolution was "one year ago" in the Government. The Government had withdrawn from the conference in February, 1925.

STOCK INDUSTRY IN THE WEST IS FLOURISHING

Calgary—D. E. Riley, High Rider, was selected president of the Western Stock Growers' Association at their thirtieth annual convention held here. Dr. Maxwell Clarke, of Oils, in a striking speech, said that the producing end of the stock business was all right, but that the distributing end was not keeping their election promises given in 1921, and advocated bringing the Americans to time by increasing the export of cattle to Great Britain which he said could be done by removing the barriers to greater trade with Great Britain in general.

President D. E. Riley, in his annual address, paid a touching tribute to the late George Lane and said also that the stock industry is now in a better shape and has a brighter outlook than for years. He pointed out that the demand for work horses has been increasing since the war.

Among the resolutions passed were: One expressing appreciation of the action of the Federal Government in restoring the 21-year-old horse laws to members of Western Canada; expressing appreciation of the work of the attorney-general's department in putting the C.P.R. to reduce freight rates on cattle; urging the Dominion government to keep all acreages in the country for food purposes; urging the Dominion Government to appoint a trade commissioner in Washington.

Must Be Properly Equipped

Cattle Vessels to Carry Mechanical Killer Is New Order

Ottawa—Vessels carrying cattle or other animals to the coast must now be properly equipped with a mechanical killer, after May 1 must be supplied with a proper mechanical killer.

An order in force issued by the British ministry of agriculture was received at the federal department of agriculture and forestry in Ottawa. The new order is intended to provide means for the humane slaughter of animals which are to be killed on the coast. It is stated, owing to the occurrence on the steamship Manchester Producer, during a recent voyage to Great Britain when, owing to heavy storms, a small number of cattle suffered from lack of food and finally had to be killed.

Deaf, Listens Over Radio

Highgate, N.Y.—A deaf man, 41 years of age, Mrs. James Allen heard music distinctly over the radio when a programme was being broadcast from a local station. Circumstances show an interesting coincidence, as the last music that Mrs. Allen heard before becoming deaf was music in England, more than 10 years ago. This is the second instance this year where local parties who had not heard music for years have heard music over the radio.

Was Sister Of Pops Plus X

Boston—A brother of self-sufficient devotion to religion has been added with the death of Anna Starr, youngest sister of the Pops Plus X, after two months' illness and a difficult operation. Anna, 26, was a singer. She died almost in poverty in the tiny apartment faring St. Peter's Square in which she had lived for many years with Maria Starr, now the only surviving sister of Pops X.

Another Conference Planned

Winnipeg—Invitations to preachers of other Canadian provinces to attend a second inter-provincial conference on succession duties will be sent out by Premier John Bracken. It was suggested that the meeting be held either in Montreal or Toronto.

Atbashas Commemorate

Ottawa—Hon. Mr. Justice Beek, of the appeal division of the Supreme Court of Alberta, has been appointed joint commissioner to investigate charges of alleged irregularities in the constituency of Alberta, Alta., during the recent general election.

B.C. Markets Near Potatoes

New Westminster, B.C.—New potatoes, grown in the area, were marketed here by a Fraser Valley farmer and commanded a price of forty cents a pound.

To Preach On Streets

Chicago—Believing there is need to take the gospel to the people instead of waiting for the people to go after it, fifty Chicago preachers have decided to preach on the streets this summer.

Estimated Per Capita Wealth Of the Three Prairie Provinces Higher Than In Other Parts

While the national wealth of Canada was estimated in 1921 at \$2,255 per capita, the estimated per capita wealth of the prairie provinces is placed at \$2,296, an increase over the average of \$771, according to a recent report of the Dominion bureau of statistics which collects the necessary data to treat the three prairie provinces of Canada as a separate unit. Of the total per capita wealth, agricultural wealth made up \$1,916, of which \$1,071 represents the farm values of land, buildings, implements, machinery and livestock.

The wealth was distributed among the 1,246,957 inhabitants of the prairie provinces, the bureau estimating that by 1923, this wealth would be \$2,046,000. The population was spread over a total area of 440,063,794 acres, of which 125,281,000 is arable land and 75,281,501 was under cultivation in 1921.

With these figures in mind, the bureau states that the total value of production, or income of the prairie provinces was \$948,600,000 in 1923, which, after making deductions for depreciation and maintenance of the agents of production, resulted in a per capita income for the prairie inhabitants of \$242.

A survey of production in 1923 shows the provinces to be fundamentally agricultural. In 1921, 91 per cent. of Saskatchewan values were obtained from farming, while in Manitoba and Alberta the proportions were 82 per cent. and 74 per cent. respectively. Mineral production held second place in Alberta, coal mining, of course, being chiefly responsible for this. In Manitoba and Saskatchewan, manufacturing was second in importance.

Canada's Dairy Production

Nearly All the Provinces Show An Increase in Output

There was an increased production last year of 1,769,846 lbs. of butter and 3,361,364 lbs. of cheese in Canada compared with the previous year. All the provinces excepting Ontario, which was stationary, and Alberta, which shows a decrease of 12.3 per cent., show an increase in butter production. In Ontario, the increase was 2.4 per cent. and in Alberta, 1.9 per cent. All other provinces show an increase. Quebec produced 23.4 per cent. Manitoba of 23.3 per cent., Saskatchewan of 70.2 per cent., and the Northwest Territories of 2.3 per cent. and Nova Scotia of 1.2 per cent. These figures are taken from the recent issue of the *Review* published by the Dominion dairy and cold storage branch. The committee requests all dairy farmers and creameries to send in statements annually of their production to him at Ottawa for compilation and publication in the *News Letter*.

British Farm Boys

Empire Settlement Board in England Would Send Boys to Canada

More British farm boys to study Canadian farming at the Alberta agricultural schools will be obtained this year if the government decides to continue the training scheme that has been in operation for the past two years. Hon. George Hoadley, minister of agriculture, has received an inquiry from the empire settlement board in England as to whether the present arrangement, by which immigrant boys are brought over for practical training in farm methods, will be renewed for another year. A further supply of British boys can be secured, it is estimated, if the plan can be continued here.

Will Reconnect Farmers With

Three thousand British soldiers will receive the change of their life in Canada at the battle of Vimy and the battle of the Somme in a special military show at Aldershot in June.

Each year in the historic panorama, to be staged at night by the aid of powerful searchlights, will be clothed in uniform as were the men who fought on the fields where history was made.

Youth May Be Restored By Ray

The quest for youth may be attained through the use of a ray, according to the promise of Prof. Antonio Ray, radiological worker with the Rockefeller Foundation. The ray, which is called the "Ray of Youth," may be treated by the process he outlines more easily than the cases of middle age.

W. N. E. 1623

For Seeding Time

Size, Rate and Depth of Grain Sowing in the West

Three things particularly worthy of consideration at this time, particularly in wheat, are the date, rate and depth of seeding wheat. Experiments covering all three have been made at the Brandon, Manitoba, experimental farm. Regarding the first, the date, it would appear that, the latest (two weeks in April and the first in May about suit the case and that after May 10 or 12 the prospects of a good yield are lessened. Relative to the rates of seeding, on an average, five pecks per acre would be about the right thing with Red Fife, the yield being 25 bush, per acre, but with Marquis that matures five days or more earlier, seven pecks per acre would best serve and the produce might average 41 bush, per acre, that being the amount obtained at the farm. On summerfalling the tendency was for the yield to increase as the quantity of seed increased from a bushel per acre to one and three-quarters, but on stable land the increase was not so marked. The best yield, three-quarters of a bushel of seed brought a yield of 32 bushels per acre. The yield of 28 bushels, 10 bush, 15 bush, 20 bush, 25 bush, 30 bush, 35 bush, 40 bush, 45 bush, 50 bush, 55 bush, 60 bush, 65 bush, 70 bush, 75 bush, 80 bush, 85 bush, 90 bush, 95 bush, 100 bush, 105 bush, 110 bush, 115 bush, 120 bush, 125 bush, 130 bush, 135 bush, 140 bush, 145 bush, 150 bush, 155 bush, 160 bush, 165 bush, 170 bush, 175 bush, 180 bush, 185 bush, 190 bush, 195 bush, 200 bush, 205 bush, 210 bush, 215 bush, 220 bush, 225 bush, 230 bush, 235 bush, 240 bush, 245 bush, 250 bush, 255 bush, 260 bush, 265 bush, 270 bush, 275 bush, 280 bush, 285 bush, 290 bush, 295 bush, 300 bush, 305 bush, 310 bush, 315 bush, 320 bush, 325 bush, 330 bush, 335 bush, 340 bush, 345 bush, 350 bush, 355 bush, 360 bush, 365 bush, 370 bush, 375 bush, 380 bush, 385 bush, 390 bush, 395 bush, 400 bush, 405 bush, 410 bush, 415 bush, 420 bush, 425 bush, 430 bush, 435 bush, 440 bush, 445 bush, 450 bush, 455 bush, 460 bush, 465 bush, 470 bush, 475 bush, 480 bush, 485 bush, 490 bush, 495 bush, 500 bush, 505 bush, 510 bush, 515 bush, 520 bush, 525 bush, 530 bush, 535 bush, 540 bush, 545 bush, 550 bush, 555 bush, 560 bush, 565 bush, 570 bush, 575 bush, 580 bush, 585 bush, 590 bush, 595 bush, 600 bush, 605 bush, 610 bush, 615 bush, 620 bush, 625 bush, 630 bush, 635 bush, 640 bush, 645 bush, 650 bush, 655 bush, 660 bush, 665 bush, 670 bush, 675 bush, 680 bush, 685 bush, 690 bush, 695 bush, 700 bush, 705 bush, 710 bush, 715 bush, 720 bush, 725 bush, 730 bush, 735 bush, 740 bush, 745 bush, 750 bush, 755 bush, 760 bush, 765 bush, 770 bush, 775 bush, 780 bush, 785 bush, 790 bush, 795 bush, 800 bush, 805 bush, 810 bush, 815 bush, 820 bush, 825 bush, 830 bush, 835 bush, 840 bush, 845 bush, 850 bush, 855 bush, 860 bush, 865 bush, 870 bush, 875 bush, 880 bush, 885 bush, 890 bush, 895 bush, 900 bush, 905 bush, 910 bush, 915 bush, 920 bush, 925 bush, 930 bush, 935 bush, 940 bush, 945 bush, 950 bush, 955 bush, 960 bush, 965 bush, 970 bush, 975 bush, 980 bush, 985 bush, 990 bush, 995 bush, 1000 bush.

Vegetable Growing

On the Prairies

Many Reasons Why the Farmer Should Cultivate a Garden

The soil and climate of Western Canada are particularly well suited to many kinds of vegetables, and there is no reason for a lack of table vegetables in any farm home in that part of the country. In a new bulletin, the Dominion department of agriculture, entitled "The Prairie Farmer's Vegetable Garden," the authors point out that the labor involved in growing a good farm garden is very little. Does not demand special equipment, and can be done in spare time. Such a garden furnishes an attractive and healthy variety in the daily fare and saves money otherwise spent for a limited, irregular and inferior supply of vegetables. Besides, many private farms are so situated as to command a ready and profitable sale for surplus garden crop. The bulk of which may be obtained free from the Publications Branch, Department of Agriculture, Ottawa, and the authors of the bulletin for the guidance of the private farmer who desires to start a garden.

Improving Roads in Alberta

Has Through Good Results

Since the province of Alberta commenced its highway building programme under the Canadian Government federal aid plan, the work started at the beginning of the season of 1924 and continuing during 1925, a total expenditure has been made of \$1,735,725, of which amount, \$179,500 was spent on the main highway between Calgary and Edmonton, according to the annual report of the provincial department of public works. Since the inception of the main highway programme in 1924 the province has all weathered roads constructed, that is, gravel surfaced, during the season of 1924 amounted to 123 miles, in addition 29 miles surfaced during the previous year. The year also saw the completion of the main highway between Calgary and Edmonton, a boundary survey undertaken by the commission appointed in 1913 from the international boundary to the north boundary of township 27, a distance of approximately 780 miles.

Some Reliable Signs

Some Ways by Which Weather Can Be Forecast

It is not always easy to tell what the weather is going to be, but a few signs are very reliable. When it is raining you will sometimes notice that the sky starts to clear in the form of an arch. Close to the horizon you will see a rainbow which indicates the beginning of the arch that will sweep across the sky until there are no clouds left. Then you may be certain it is not going to rain again for some time. Look at the clouds at dawn almost any time of the day, and if these get smaller or remain about the same size, rain is not likely. Should the clouds get bigger, expect showers soon. "In fine weather the wind increases up to midday and then gradually dies down. If the wind does not get less after noon, and still more if it blows harder towards sunset, you will be almost sure bad weather is coming.

Sweet Young Thing—Tell me, do you

also love ever get most terribly homesick? Old Seafarer—Well, I dare say we should if we had to stop there any length of time.

Most Encouraging Prospects For Sheep Raising and Wool Growing Are Seen In Western Canada

Feeding Chickens

Proper Methods For Care and Feeding Are Described

When a baby chick leaves its shell it needs warmth and rest, but no food until it shows positive signs of hunger, which will be two or three days after hatching. Proper methods of feeding are described in detail in a new bulletin on poultry feeds and feeding issued by the experimental farms and distributed by the Publications Branch, Department of Agriculture, Ottawa. According to the bulletin, when the chicks are removed to their brooding quarters there should be some coarse straw or grit and fine gravel scattered around them so they can have free access to it. For the first few days, after feeding is begun, they should receive dry mash five or six times a day, and then they should be given small quantities of chick scratch feed. A good routine for this period consists of one part each of about middlings, cornmeal and oat flour, half a part of fine meat meal and a little fine table salt, about 1/4 to 1/2 of one part. If there is no bone meal in the mash five per cent. bone meal is substituted for an equal amount of meat meal.

Grit or cracker shell is provided when first fed. Fountains of milk and water, which should be renewed often, are kept before the flock at all times. Clover leaves and sprouted oats or other green feed is necessary.

After the first week or ten days, most mash may be given, using sterile eggs, shells and oil, or raw liver run through a meat chopper, or cod liver oil—all mixed up with the dry mash mixture. The egg mash being gradually replaced with mash moistened with milk. If rapid maturity is desired, the moist mash may be kept up after the chicks are discontinued.

Slab, sent mash will pick up their feed, therefore, the sweet mash feed should be such that it will be cleaned up in a few minutes. If too much has been fed, the surplus should be removed.

One of the best ways on the range that can be used with very little labor, dependence being placed largely on hopper feeders. A clover hedge in corn field or an orchard makes an ideal range.

New Variety Of Field Peas

Experimental Farm at Ottawa Introduces the Mackay Field Pea

The introduction of a new and valuable variety of field peas, which "mean to the grower of field peas what Marquis has meant to the grower of wheat in the west," is announced by the Dominion experimental farms system. The new variety is a selection from Marquis and it is one between a variety known as Mummy and an other called Black Eye—Marrowfat. On the average for the past five years at the central experimental farm at Ottawa, this new variety, which is called Mackay, has yielded over ten bushels more per acre than the well-known variety called Antler.

Jack—"That new evening gown you looks just like a spider's web. June—"Yes and you'd be surprised at all the insects I've caught with it."

Things Having Best Knowledge of the

world situation in this regard, both in Canada and outside it, continue their advice of the Dominion department of agriculture to devote more energy to sheep raising and the production of wool. Walter Andrews, president of the British Wool Federation, whose time are devoted by Canada of the slogan "Grow More Wool," and again at the opening of the year 1925 drew the Dominion's attention to the remunerative character of wool production and urged the Dominion's closer attention to this form of enterprise.

"The world never has had enough wool," he stated, "and is never likely to have it."

Canadian authorities on the subject, such as the president of the Canadian Wool Manufacturers' Association, and the Dominion's attention to the remunerative character of wool production and urged the Dominion's closer attention to this form of enterprise.

"The world never has had enough wool," he stated, "and is never likely to have it."

Lord Allenby meets former Officers

Members of the Jaffa Gate who met Lord Allenby, Governor of Palestine, under him during the Great War. The majority of these men came from British Columbia, since the Armistice and have settled in the Okanagan Valley, Vancouver, Victoria and other points on the Mainland and Vancouver Island.

These Officers Include Capt. J. H.

Thompson, Lieut. John Thompson, Major H. T. Curtis and Major George Watson, M.P., all of Vancouver; Capt. T. H. Matheson, Kelowna; Capt. R. V. Becker, Edmonton; B.C.; Capt. J. H. G. Cole, Duncan; Capt. J. N. Hodges, Colesburg; Capt. C. J. Coyne, Brooks and Lieut. F. A. Hall.

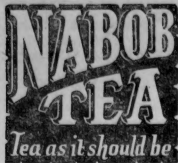

Say "Hello" Across Continent

Although it cost the provincial government of Alberta no investment of only \$1,500 to establish connection with the universal telephone service by a continent-wide phone connection, the Alberta Government telephone department has had a revenue of \$400 a month from the service almost since its inception. The outgoing calls average 250 a month.

An Expensive Post

It seems absurd that the American ambassador to Great Britain, while drawing a salary of \$139,000 should have to spend from \$25,000 to \$30,000 out of his pocket. If a Canadian ambassador, appointed to the United States, will be have to pay in this way—Kingston Herald.

Miss Sarah Beall, a mathematician, and the only woman now connected with the United States Coast and Geodetic Survey, has been appointed a boat which is a complete history of the astronomical work of the survey since 1846.

WORLD HAPPENINGS BRIEFLY TOLD

Lord Somers has been appointed Governor of Victoria, Australia, in succession to the Earl of Strathmore.

Japan's newest and largest all metal monoplane crashed at the Yokohama naval base. Three officers and one mechanic were killed.

A letter embodying a final appeal to Soviet Russia from the League of Nations Council to participate in the disarmament studies in Geneva was made public at Geneva.

Five thousand settlers are in sight for Canada this year under the land settlement scheme, according to Major John Barnett, chairman of the Soldier Settlement Board.

The Prince of Wales finished seventeenth in a field of twenty-four in the Brigade of Guards inter-regimental team race at Puttichall, Northants, Eng. His horse, Ragsdale II, was outclassed throughout.

The United States representation at the Geneva preliminary disarmament discussion, to begin May 12, will consist of Hugh Gibson, minister of Switzerland, and blue advisers and technical assistants.

The development of an entire island by a single company for the purpose of increasing the production of phosphorus is forecast by Honolulu but two men who have visited the island of Lanai.

The dignitary to be used by Captain Rold Amundsen in his Polar flight has been informally designated "The Norse," and turned over to M. Thom, asen, president of the Norwegian Aero Club.

The cost to Canada of sending Canadian troops to Siberia in 1918 and 1919 was \$2,253,360. Answering a question from J. S. Woodworth (Gaber, Winnipeg North Centre) in the House of Commons, the government said that the actual cost of the Siberian expeditionary force was not known.

Displaces Flour Milling Industry
Canada's leading manufacturing industry is now the pulp and paper industry, having recently displaced the flour milling industry. The total value of pulpwood exported, pulp exported and paper manufactured in 1921 reached the sum of \$187,000,000.

Two pure white canaries, only ones of their kind in Canada, were visitors at the annual show in Winnipeg, of the Western Canada Pouter Canary Association and Winnipeg Bird Society.

Violator (from town): Really, I don't care for men at all. Since I've been down here I've said "no" to four.

Country Cousin: Indeed? What were they selling?

Seek Missing Link Expedition to Heart of Gobi Desert to Find First Traces of Primitive Man

Bound for the Gobi Desert in an effort to establish definite proof that ancient Asia was the mother of life in Europe and America, Roy Chapman Andrews, of New York, will sail for the Orient on the California Pacific S.S. Express, of Russia. On previous expeditions for the American Museum of Natural History, Mr. Andrews and his fellow scientists unearthed fossilized skeletons of dinosaurs and other prehistoric monsters in the Gobi deserts.

If, during the remaining two years of the expedition they find bones of prehistoric man, the expedition will have established the earliest and most authentic evidence of the missing link. The expedition will be the first to take automobiles into the heart of the Gobi Desert and five motor trucks are included in the outfit. The Andrews caravan will include, in addition to the automobiles, twenty-five camels and a party of twenty-six men, including noted scientists, taxidermists, photographers and a motion picture cameraman.

May Cut Income Tax Reduction in Federal Income Tax Is Forecast By Minister Of Finance

Reductions in the federal income tax were forecast by Hon. J. A. Robb, minister of finance. In answer to a delegation representing the Retail Trade Bureau of Canada he stated that the government hoped to cut the income tax as soon as the financial situation permitted. An announcement as to the government's intentions regarding the income would be forthcoming at the proper time stated Mr. Robb.

Taxes were burden on the people, Mr. Robb admitted but, he added, the government must have money with which to carry on the affairs of the country, pay interest on the war debt, pensions, etc. Many of the taxes of these would disappear as the effects of the war were eliminated. The government must have money with which to carry on the affairs of the country, pay interest on the war debt, pensions, etc. Many of the taxes of these would disappear as the effects of the war were eliminated. The government must have money with which to carry on the affairs of the country, pay interest on the war debt, pensions, etc. Many of the taxes of these would disappear as the effects of the war were eliminated.

Professional Nurse Lood In Her Praises

Thanks to Dodd's Kidney Pills She Was Relieved of a Weak Back and Rheumatism

Mrs. E. Emery, now recommended Dodd's Kidney Pills to Any of Her Patients Who Suffer with Kidney Trouble, Lambton, N.S., writes:— "I cannot praise Dodd's Kidney Pills too highly. I have suffered from a great deal with a weak back and rheumatism. I used a lot of doctors' medicine but they did me no good. I was advised to try Dodd's Kidney Pills. I gave a number of boxes and soon got relief. I often thank my good friend who gave me the advice about Dodd's Kidney Pills. I was very much pleased that I did not have to give up my profession of nursing. I am bound to praise them for relieving me and will always recommend them to any of my patients who suffer from the same trouble as I did. I am very thankful to write this testimonial for Dodd's Kidney Pills."

This letter comes from Mrs. E. Emery (nurse) of Lambton, N.S., and tells of the benefits to be derived through the use of Dodd's Kidney Pills.

Red Lake Gold Field
Claims staked in the Red Lake gold mining field are keeping the recorder's office busy. Prospectors are of the belief that the area from Red Lake to the Manitoba boundary is promising and already many square miles of territory west of Red Lake has been staked.

A compromise is an agreement by which both parties get what they don't want.

CUTICURA HEALS ITCHY ECZEMA

Caused Much Suffering, Nose Swollen and Sore, Face Disfigured.

"Eczema broke out in red spots and pimples on my cheeks and nose. The eruptions grew larger and my nose was swollen and sore. It itched and burned so much that it kept me awake, and scratching caused eruptions. My face was disfigured and caused much suffering. I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. I purchased more and after three months' treatment my face was healed." (Signed) Mrs. Corinne Desjardins, Albertville, Sask.

Daily use of Cuticura Soap, with touches of Cuticura Ointment now and then, keeps the skin fresh, smooth and clear.

Sample Box Free by Mail. Address: Cuticura, P.O. Box 1024, St. Louis, Mo. Send 10¢ for Cuticura. Shipping 5¢. Box 25¢.

CLIPSE FASHIONS

Exclusive Patterns by Hand Design

In Swing With The Mode

The flare coat is the newest mode of the season. Introduced in Paris and coming with enthusiasm on this side of the water. A coat that speaks the very last word in smart, swaggy lines and material. It is necessary to have a "wrap" in which utility and appearance are combined. In these days of social life and of varied activities in social life. Fashioned of tweed in tones of tan and brown, the back is cut plain and falls in soft ripples from the shoulders. The collar is convertible and long reverses fasten in single-breasted fashion with two long buttons. Thin patch pockets have a lip trimming and narrow cuffs. Finish the outfit with a hat.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents to copy.

There are three miles of cherry trees bordering the driveway of Potomac Park, in Washington.

ON THE AIR What Is Doing in the World of Radio

The radio equipment aboard the Levantine provides for communication with points 3,000 miles distant.

Dr. V. P. Pomeroy, professor of physics at Saratov University, Russia, has invented an apparatus which he asserts will transmit photographs of moving objects by wireless.

An officer of the United States navy, William R. Purnell, has taken out a patent on a "radio game" which is an ingenious modification of the classical fidelity winks.

The first broadcasting station in the Irish Free State has been built by the Marconi Wireless Telegraph Company in the McKee Barracks on the outskirts of Dublin.

The Evening Standard says that after three years of research, Sir Oliver Lodge, the eminent scientist, has solved the problem of the wireless "howler" or oscillator, which has baffled experts since the advent of the wireless.

Station WOR, Newark, N.J., has found that by changing its aerial the transmitter operates more efficiently. The flat top, eight-wire antenna which was formerly used has been discarded and in its place is a six-wire, cage-type aerial.

Within six months the new mammoth wireless transmitting station at Kikrik (65 miles inland from Bombay) will be in full working order, sending messages to England at 1,000 words a minute on the present cable routes.

Devices that tend to create radio interference are unlawful in Sublette, Ill., the village board has decided. It passed an ordinance making it against the law for any person to have, operate or maintain any instrument or device that interferes in any way with radio reception.

Station WKRC, Cincinnati, O., has made plans for a new studio. The studio arrangement calls for a large orchestration studio, solo studio, a control office for operators, a private office for the studio director and engineer, a promenade, an artist's lounge and a live reception hall.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that find their way into the intestines. The latter are the most dangerous. They are found in the intestines and if not interfered with work havoc. Ado's Worm Powders dislodge both kinds, and while expelling them from the system serve to repair the damage they have caused.

Bariff National Park
Attendance at the Bariff National Park in 1921 broke all records, according to a prominent Sturgeon. The park revenue amounted to \$140,000 during the season, and more than 67,000 people registered at the hotels. Nearly 90,000 people passed through the east entrance of the park alone, which was 47 per cent. greater than the previous year.

She Could Never Do The Things Other Girls Did

Mrs. J. E. Ross, Scotland, Alta., writes:—"I am only twenty years old, but have suffered from heart palpitation and nerve trouble for several years."

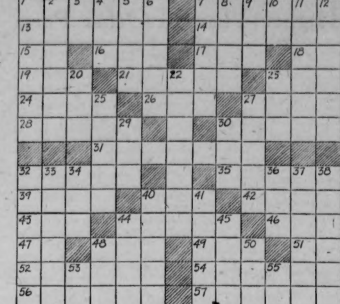

I could never do the things other girls did, that is, in the line of sports, skating, etc., and could never depend on myself at work. About six months ago I began taking

MILBURN'S HEART NERVE PILLS

and an joy twice the girl was and can enjoy everything in general life so much more. I am very grateful for what your pills have done for me."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

OUR CROSSWORD PUZZLE

- Horizontal**
- 1—Wretched scariest of food.
 - 2—Ridiculous.
 - 3—Evolutionary prayer.
 - 4—Supplaining duty.
 - 5—Pithy saying.
 - 6—Damp.
 - 7—Note of the scale.
 - 8—Stevenson Arabian.
 - 9—Not up.
 - 10—At no measure.
 - 11—Liquid measure.
 - 12—Free.
 - 13—Stern orifice.
 - 14—Short pastoral poem.
 - 15—Gauding-bear voice.
 - 16—Neighbouring frost-maid.
 - 17—Harsh.

 - 40—Come in.
 - 41—Mended.
 - 42—State emphatically.
 - 43—Make a certain kind of edging.
 - 44—European cyprinid fish.

SUNDAY SCHOOL LESSON

THE STORY OF CREATION

Golden Text: In the beginning God created the heavens and the earth.

Genesis 1:1-2:25.

Devotional Reading: Psalm 33:9.

Explanations and Comments

I. God the Creator, verse 1.—The first verse of Genesis is the summary, and the remainder of the chapter the detailed account of creation. There are three great thoughts in our text: (1) That the world did not come from chance, but had a Creator, God; (2) That God had a purpose in the creation of the world; (3) That the process of evolution culminated in man, and God's purpose for him was that he should be in the image of God.

II. The beginning, God. Before the mountains were brought forth, or ever that hadst formed the earth and the world, even from everlasting to everlasting, thus God, says the Psalmist (93), "in the familiar words of Watts:—

Before the hills in order stood, Or earth received her seed, From everlasting thou art God, To endless years the same.

Each thoughtful study of the opening words of Genesis but leads one to a truth greater meaning than trust: "I believe in God, the Father Almighty, maker of heaven and earth."

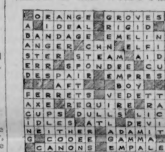

III. Primitive Chaos, verse 2.—And the earth was waste and void; and darkness was upon the face of the deep. The Hebrew words are an alliterative description of a chaos in which nothing can be distinguished or defined" (Professor S. R. Driver). Chaos is absence of order; darkness is absence of light. The deep is not the sea, but the primordial mass of water thought of as enveloping the formless earth. And the Spirit of God moved upon the face of the waters. Was brooding upon the marginal rendering of the Bible.

Aeroplane to Drop Feed.

For what is believed to be the first time on record, an aeroplane will be used to distribute feed to the game birds in Blair County, Pa. A hopper with a capacity of 200 pounds of mixed grain and corn will carry the feed.

Answer to Last Week's Puzzle

That Stomach of Yours!

—Midnightwaite Studio

Toronto, Ont.—"Dr. Pierce's Golden Medical Discovery is the very best medicine any one can take for stomach trouble and to build up the blood when it becomes thin and impoverished," said Mrs. Peter, Surgeon of 90 Cornwall St., Toronto, Ont. (Picture above). "I suffered all the time from stomach trouble. My food did not digest properly, would set heavy on my stomach, causing me to suffer from great distress. Food did me no good. My blood was impoverished and I did not have enough. But, after taking Dr. Pierce's Golden Medical Discovery my digestion was good and my trouble was as an end so far as my stomach and blood were concerned. The food I ate nourished my body and soon my blood was in a good healthy state."

At all drug stores, or send 10 cents to Doctor Pierce's Laboratory in Buffalo, N.Y., for trial package.

TIPPITY-WITCH IRENE

GOODNIGHT IRENE? WHAT ARE YOU DOING? WEARING TWO PAIRS OF GARTERS?

GOODNIGHT? SILENT? I SUPPOSE I SHOULD GO TO BED. I'M TIRED.

WELL OF ALL THE CRAZY THINGS! WOMEN MUST BE DIPPY!

DAD PUTS ONE OVER

SURELY, I'M TIRED. I SUPPOSE I SHOULD GO TO BED. I'M TIRED.

LIKE YOU PROMISED—YOU'D BETTER STEP ON IT!

ALRIGHT! I'VE GOT MY HORSES.

I'M READY! LET'S GO!

AN insurance company does not put all its eggs in one basket. It distributes the risks it takes in order to minimize losses that occur.

The capitalist does not invest all his money in one venture, he spreads his investments in order to reduce the risk.

The farmer who diversifies his efforts by mixed farming never goes broke. He is a far better banking risk than the man who merely mines the soil by growing grain alone.

The Bank of Toronto stands ready to lend every reasonable assistance to the sound development of mixed farming.

In Lighter Vein

Parents and Merchants take warning. Parents, keep your youngsters off the streets—Merchants, watch your plate glass—for old man Affleck is going to drive his new car in town.

A report was in circulation yesterday that a new "mining" industry had started within the village limits. Upon investigation, the cub reporter found The Coal Dust Twins at work in one of the local coal sheds—and while their work could hardly be termed "a new industry" they were certainly making the dust fly.

The Bell With the Voice of a Woman

Canadian Pacific Line "Empress of Scotland" moored at Newlyn, near Home Row.

NOT far from the Temple of Today, at Nara, Japan, there is a fantastic bell which weighs about forty-eight tons. It is 13½ feet high, 10 inches thick at the rim, and 27 feet in circumference, and the volume of its tones is enormous and awe-inspiring. At times it seems as if there were a woman in the bell, weeping bitterly in the night, singing blithely during the day. Passengers making the round World Cruise on the Canadian Pacific Line Empress of Scotland heard it ring, saw the immense volume away.

About this famous bell there is a fantastic tale carried on the lips of elated, Mongolian children through the picturesque, intriguing streets on which they play. Many hundreds of years ago, a stern and powerful Emperor ruled Japan with an iron hand. When his will was command, impossible feats for his men. One day he decided he would have a new bronze bell, one which would ring louder and longer in peal than any other bell in his empire.

So he sent for Hop Si Wong, the official bell-maker, an aged and honorable servant of the Crown for many years, a man who had served three Emperors. And Hop Si Wong was told to make a bell that would please the Emperor. An article bell, a beautiful bell, a bell with a tone like a human voice.

Hop went away to his workshop, which was near his home, and worked for days and nights, mixed the ingredients, watched over the melting pot. Finally the bell was made and erected. Round it came.

No sooner had the Emperor called for

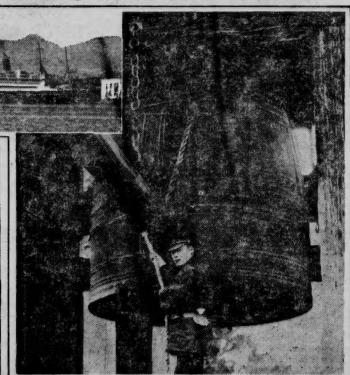

Glenfair Horse Breeders Club

The Glenfair horse breeders Club has been fortunate in acquiring the stallion High Flash, from John Henderson, of Dunsmuir, Sask.

This colt, rising 3 years, was shown at the Regina spring show. It took second in its class, and was named reserve champion in Saskatchewan breed stallions. It was first in its class at Calgary. Sire: Halloo Surprise (imp.) Dam: Donna Lodge Doris. Sire of Dam: Baron of Aroela.

The colt is clubbed under the federal aid to the Glenfair Horse Breeders Club.

Say you saw it in the News!

Hop, "Inebell!" thundered the Emperor. "May your foot carcass be devoured by demons. That you should inflict upon the ears of my monarch this desecration. Do not call that a bell! An unwieldy lump of brass is it. Go and make another and, if you fail, untold agony will be your due." So spoke the Emperor. Perhaps not in those words, but in similar language, for Hop came home that night in mortal fear and trembling.

Hop had a beautiful daughter. She was as good as she was beautiful—indeed, a rarity. To her, Hop sobbed out the story of his failure and the displeasure of the Emperor. She listened sympathetically and nodded wisely and told Hop to start work for immediately on the second bell.

Again the ancient servant worked for days and nights. Again he boiled his ingredients. And one day at twilight, just as he was watching over his

Swat that fly, every fly killed now means one million less in June, and one million less chance of disease.

John F. Miller, eye specialist of 404 Underwood Block, Calgary, will be at the hotel in Oyen on Saturday April 10. Tell your neighbors he is better equipped than ever.

Miss Betty Anderson, spent the week-end visiting her parents at Stanmore.

Miss Grace Colwell is the guest of Mr. and Mrs. F. L. Aylesworth, while visiting her sister during the Easter holidays.

Mr. William L. Irvine, school principal, is spending the Easter holidays at his home in Calgary.

Mr. and Mrs. Jack McKenzie who have been spending the last three months visiting in Nova Scotia, returned to Oyen last week.

Mr. and Mrs. Gus Schmitt, who have been spending the winter months in Drumheller, returned to the district on Monday.

"Ueelo" Bob left last Friday morning to spend a few days at his home in Calgary.

Miss Kathleen Lynett, of Calgary, is spending the Easter holidays with her brother Rev. C. Lynett.

Miss Shirley Scott, of Calgary who arrived in Oyen last Friday, is the guest of her cousin Miss Margaret Naismith.

Ed Peckham, who has been spending the winter months visiting in the States, returned to Benton last week.

A special Easter service will be given at St. Cecilia's Church next Sunday, by Rev. R. Walker. All are cordially invited.

Strayed, young fox terrier dog. Answers to the name of Bim. Please return to W. V. Miller, Oyen, Alta.

LANFINE LOCALS

The W. I. met at the home of Mrs. M. Macdonald last Wednesday, when ten members were present. Mrs. Macdonald gave a talk on gardening and the proper time for planting seeds. Roll call was answered by verses on Spring. At the close of the meeting, Mrs. John Sanders, on behalf of the institute members, presented Mrs. C. J. Nichol with a tea tray as a wedding gift. Mrs. Nichol, after thanking the members for the gift, had all present sign their names on the back of the tray. Refreshments were served by Mrs. J. S. McKenzie and Mrs. M. Macdonald. The next meeting will be held at the home of Mrs. T. M. Wardell; subject "Dressmaking".

The entertainment held on Thursday evening, was quite a success. The net proceeds being about \$40, this was applied on the hall debt.

The Misses Caroline and Ella Johnson, returned from Calgary Friday morning for their Easter vacation.

The Anglican Church, Easter services held on Sunday afternoon were well attended and much appreciated by all.

Mrs. C. Powers arrived from Calgary to join her husband here, who has accepted the position as night agent at the depot.

Miss Eve Godfrey, is spending her Easter holidays with Mrs. J. S. McKenzie.

Mr. and Mrs. J. H. Cooper, are rejoicing over the birth of a slaughter born to them in the Cereal Hospital, on Friday.

Mrs. Cecil Moore was taken to the Cereal Hospital last Thursday.

A few ladies called for a social hour with Mrs. H. C. McFarlane on Monday afternoon, all spent a very happy time. Mr. and Mrs. McFarlane intend to move to the farm again shortly.

Mrs. John Sanders has been confined to her bed for a few days, with a severe cold.

Quite a number attended the sale at O. A. Garriens and report good prices.

Mr. and Mrs. W. M. Sanders, entertained a few friends last Sunday, to dinner in honor of Mr. Sanders' birthday. The candles in the cake were too numerous to mention.

Mrs. Marian Marsden, left on Tuesday morning to attend the teachers convention being held in Calgary.

Mrs. E. J. MacKenzie has resigned her position as teacher at the Elementary and has left for the East.

The members of the local U.F.A. are arranging for a debate to be held Thursday evening, April 8, at 8 p.m. Subject: Resolved that the Immigration Policy advocated by our present Government, is a benefit to Canada. Affirmative J. C. Cotter and W. J. Ada. Negative Roy Anderson and O. Stevenson. There will be a short program and dance. Admission to debate and concert 25 cents, ladies with cake free, dance afterwards 25 cents.

X-Ray Service

The new Victor X-Ray is now installed and operating in Oyen General Hospital. All classes of X-Ray photography taken, including dental X-Rays.

Latest Carbon Light, now installed, is the modern cure for chronic rheumatism, pleurisy and joint pains.

Special Cases taken at any time, day or night.

If special appointment desired
